

## Learning Through Gamification

A great addition to any Nursery, Key Stage 1 or 2 classroom.

Inspire fun learning with subject specific content. Children learn through Gamification creating an environment that encourages collaboration and team building.

The G-Touch Tables are pre-loaded with a range of software<sup>1</sup> that encourages numeracy, literacy, creativity, letter formation, music, art and much more. Many of these programmes are multi-touch, enabling several children to use the screen at the same time. This encourages children to develop important skills such as socialising, learning to take turns, working together, sharing and communicating.

All G-Touch Tables are supplied with our G-Safe<sup>2</sup> platform, meaning that children can use the tables without being able to access any restricted websites or settings. The G-Safe platform places all setting controls behind a PIN controlled area – this allows the teacher to take control of whitelists, blacklists, volume control and more. The settings can be easily changed depending on the circumstances but teachers can be safe in the knowledge that they can leave children to use the tables without supervision.

G-Touch Tables can be used in a horizontal position as a table, allowing more students to interact together around the table. Alternatively, the tables can be tilted through 75° to enable students to use it more comfortably sitting down or if they are playing on their own.

The Hi-Lo version of our 42" G-Touch Table can be placed in the vertical position. The height can be altered, which allows comfortable access for taller students or for wheelchair access. The G-Touch Table range comes in three configurations, all with a built-in Windows PC. See overleaf for full specifications.
